

Is your child struggling with
reading & writing?

At BrainWave, we teach
step by step with one- to-one
attention.

This helps children read &
write confidently
instead of just memorizing.

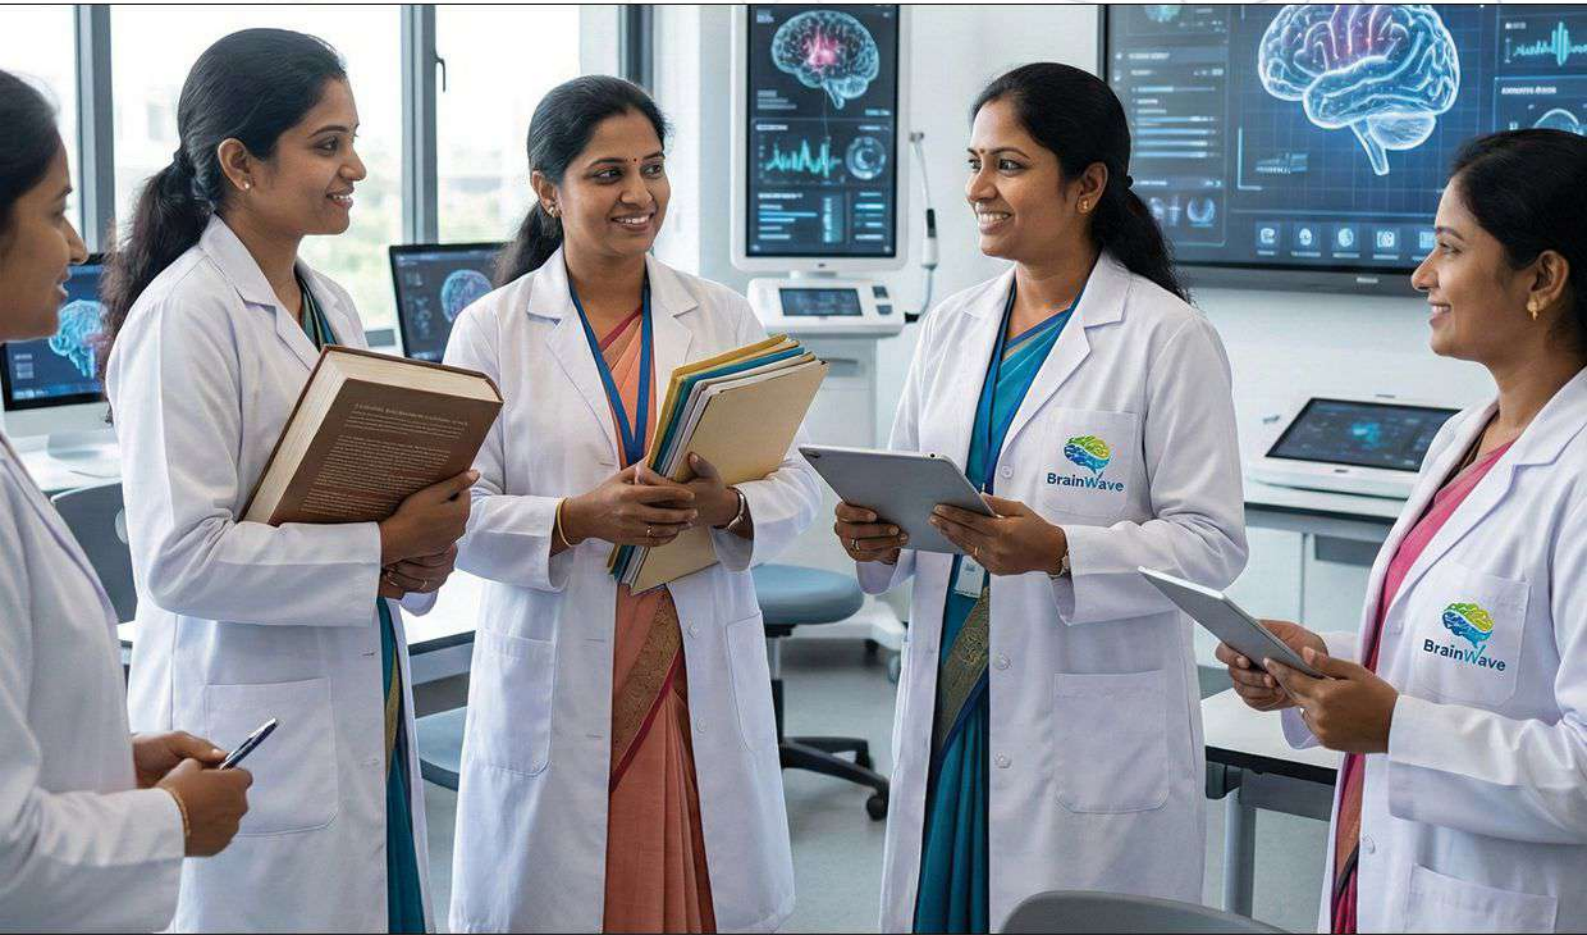

“Reading challenges aren't about **intelligence**.
They are about how the **brain** processes sounds.
We **bridge** that **gap**.”

About us

Brainwave Remedial Class is a specialized learning support center created to help children overcome academic and attention-related challenges in a positive and structured environment. We believe that every child is intelligent, but each child learns in a different way and at a different speed. Some children need extra time, special methods, and individual guidance to understand concepts clearly. Brainwave was started with the aim of giving that extra support.

Our Belief

At **Brainwave**, we believe:

“Every child can shine when given the right support, right method, and right encouragement.”

Our Vision

To create confident, independent learners who enjoy learning and believe in their abilities.

Our Mission

- To provide structured remedial education
- To use child-friendly, activity-based teaching methods
- To give individual attention
- To work closely with parents for continuous improvement
- To support children with patience, care, and encouragement

Our Purpose

The main purpose of Brainwave is to:

- Identify learning gaps early
- Strengthen basic foundation skills
- Improve reading, writing, and spelling
- Support children with concentration difficulties
- Help hyperactive students learn in an organized way
- Build confidence and independence
- We focus on both academic growth and emotional development.

What Makes Brainwave Special?

Individual Attention

Every child's learning level is assessed before starting. Lessons are planned according to the child's needs.

Multi-Sensory Teaching

We use visual, auditory, and activity-based learning methods to make concepts clear and long-lasting.

Structured Support for Hyperactive Students

Structured Support for Hyperactive Students

Short tasks, movement breaks, and positive reinforcement are used to improve focus and behavior.

Strong Foundation Building

We concentrate on basics like phonics, blending, reading fluency, sentence formation, and math concepts.

Confidence Building

We celebrate small achievements to motivate children and increase self-esteem.

How Our Remediation Works

Step 1: Diagnostic Assessment:

We don't guess. We test phonological awareness and decoding skills to find the root cause.

Step 2: Structured Phonics:

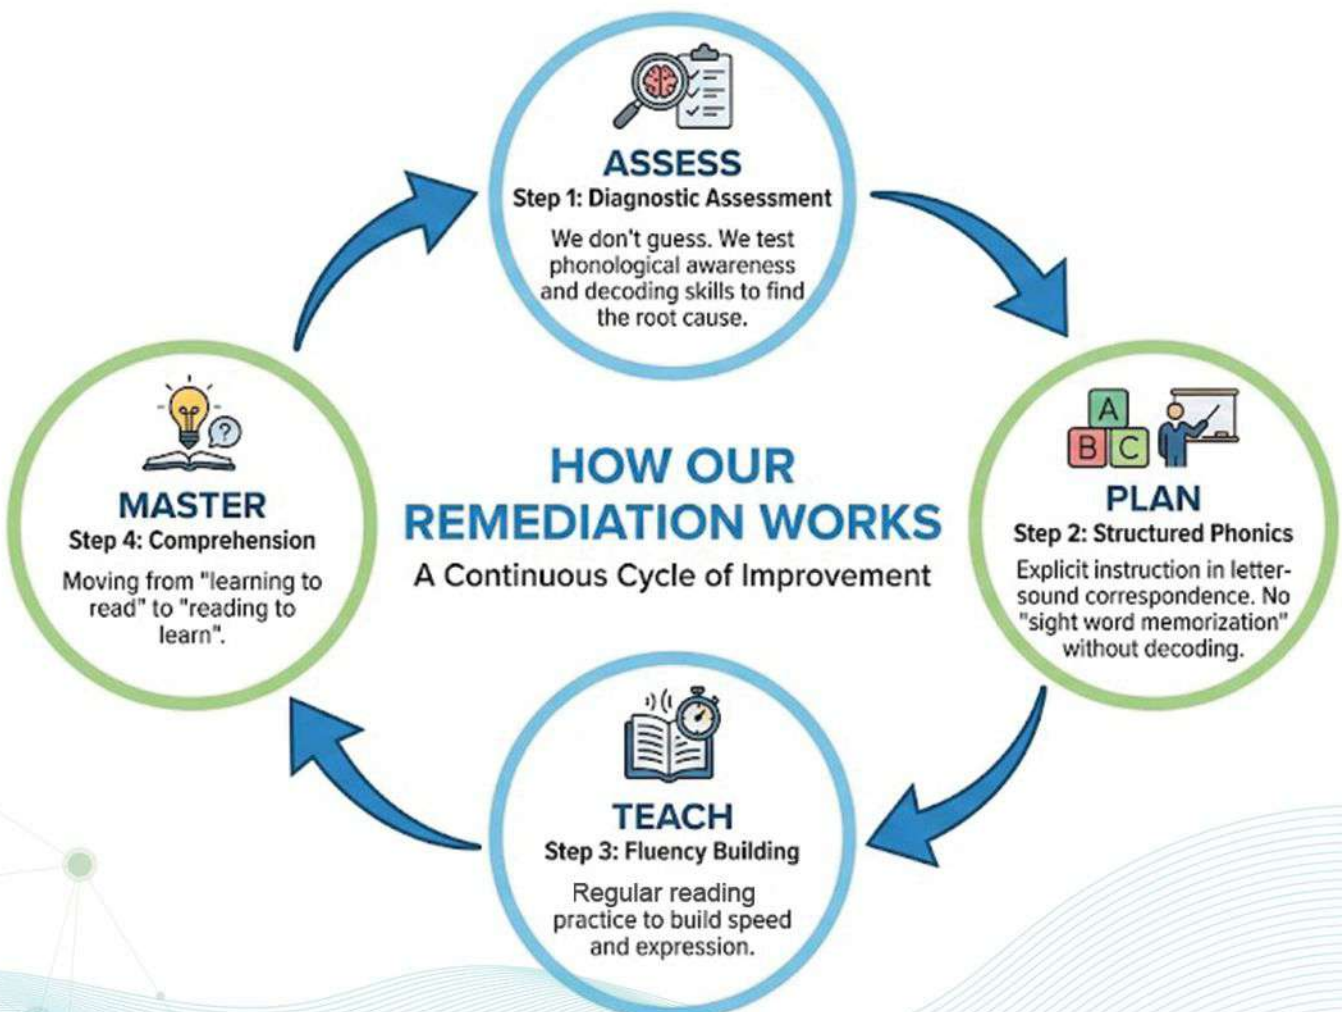

Explicit instruction in letter-sound correspondence. No "sight word memorization" without decoding.

Step 3: Fluency Building:

Regular reading practice to build speed and expression.

Step 4: Comprehension:

Moving from "learning to read" to "reading to learn."

Is your child struggling with ?

- Reading slowly or hesitantly?
- Guessing words based on pictures?
- Confusing similar letters (b/d, p/q)?
- Difficulty blending sounds together?
- Poor spelling or handwriting?
